Sort three   P32954_en

Write a procedure

void *sort3* (**int**& *a*, **int**& *b*, **int**& *c*);

to sort *a*, *b* and *c* in nondecreasing order. For instance, if called with $a = 7$, $b = -3$ and $c = 1$, the values after the call must be $a = -3$, $b = 1$ and $c = 7$.

Observation

You only need to submit the required procedure; your main program will be ignored.
